

## **SPECIFICATION**

Please insert the following paragraph beginning on page 4, line 24:

A computer usable medium having a computer readable program code embodied therein for causing a computer system to perform an automated software distribution method comprising: receiving a request to access a software distribution system, determining if the requester is a registered user, determining if a user has authorization to perform internal or commercial scaleable software distribution framework activity, performing an internal process associated with a scaleable software distribution framework if authorized, and performing a scaleable software distribution system commerce transaction if authorized. The request can be received from an external user via the Internet. The user can be able to access an internal storage of software products. The internal user can be able to download software code, make changes and upload the modified code, and both internal and external users can be able to engage in a scaleable software distribution system commerce transaction.
